

PRACTICAL 10. Ask ChatGPT OR Google Gemini to generate a 100–120 word paragraph on: “Is online learning better than offline learning for college students?”

a) Run the AI-generated text through Grammarly and any plagiarism-check tool.

b) Now manually search online to check if similar sentences exist on blogs or articles.

c) Identify 2–3 biased statements in the AI answer, such as:

i. Over-generalizations

“Online learning is better than offline learning”

ii. One-sided opinions

“Online learning is superior”

iii. Unproven claims

“Ensures better learning outcomes”

d) Rewrite the entire paragraph in a neutral and balanced way, using AI only for grammar suggestions.

e) Submit 3 screenshots:

Online learning provides flexibility, saves travel time, and offers access to digital resources. It allows students to learn from anywhere and participate comfortably. However, offline learning supports direct interaction and better classroom engagement. Both methods have advantages, so online learning works best as a support to traditional education.	Online and offline learning both have benefits for college students. Online learning offers flexibility, self-paced study, and access to recorded materials. Offline learning provides direct interaction, better engagement, and is more effective for practical subjects. The best learning mode depends on a student’s needs and course requirements, and a mix of both can give the best results.
